## REQUESTS/WAIVERS FOR SURGICAL PROCEDURES

Listed below are additional services we offer to reduce anesthetic risks, aid recovery and add convenience.

We recommend a blood profile screening before anesthesia and surgery because some conditions may not be evident on physical exam alone. Anesthetic agents affect many organs. Most anesthetic drugs are removed from the body by the liver and kidneys therefore it is important that these organs are healthy. The latest technology lets us run safe, accurate blood chemistries before anesthetic induction. These tests are similar to those your own physician would run if you were to undergo anesthesia. In addition, the results of these tests will serve as reference values for future use should your pet become ill. It is important to understand that pre-surgical blood profile screening does not guarantee that your pet will not have an anesthetic reaction or complication. It may, however, greatly reduce the risk of complications. The staff and doctors will be happy to assist with any questions or concerns you may have.

| <b>Pre Surgical Blood Profile 1:</b> includes: PCV and Total Solids (assess BUN (kidney/hydration), ALT (liver), Glucose (sugar), Na, Cl, K (ele  | ectrolytes). STRO                       | ONGLY RECO                    | OMMENDED FOR                    |
|---|---|-------------------------------|---------------------------------|
| PETS 5 YEARS AND OLDER. This helps us determine the best A  | \$58.00                                 | Accept [ ]                    | et.<br>Decline [ ]              |
| Pre Surgical Blood Profile 2: Recommended for patients 7 years of all tests in Pre Surgical blood profile 1, PLUS a Complete Blood Cour. This helps us determine the best Anesthetic protocol for your pet.   |   |                               |                                 |
| <b>Intravenous Catheterization</b> : In the event of an emergency, a pre-pla administration of (IV) fluids and potentially lifesaving drugs. <b>REQUI</b> or having 2 or more procedures. <b>Included in canine spay and neuter</b>   | <b>RED</b> for any pet r procedures (Ex | 7 years or olde certif        | r, having a dental, icates)     |

## RELEASE OF RESPONSIBILITY & FINANCIAL OBLIGATIONS

I am the owner or authorized agent for the pet presented for surgery/hospitalization and have the authority to execute this consent. I have been advised of the nature of the services and procedures to be performed. You are to use all reasonable precaution against injury, escape, or death of my pet. I understand that anesthesia and surgery always involves some risk to my pet (such as unknown internal physical abnormalities, medication allergies, surgical complications, internal bleeding, shock, incision dehiscence, and post-surgical infections); and agree to hold you harmless, in the absence of negligence, in connection with these procedures. I acknowledge that no guarantee or assurance has been made to me as to the results that may be obtained. In the event complications arise and I cannot be immediately contacted at the below listed phone numbers, you are directed to make the decision you deem best for my pet.

I understand that Seneca Animal Hospital, PA is not staffed twenty-four (24) hours a day, and after-hours treatment of patients is at the discretion of the veterinarian.

I understand and assume full financial responsibility for all charges accrued. I understand that my pet will be considered abandoned if the clinic has not heard from me within ten (10) days of the expected date of discharge. The clinic is then authorized to care for my pet as they deem best, including euthanasia (putting to sleep), and I am still financially responsible for all charges accrued.

\*If your pet is pregnant or in heat there will be an additional fee of \$31.50 for cats, and \$40.00 for dogs under 40lbs. and \$52.50 for dogs over 40lbs. Cryptorchid (retained testicle) and overweight animals may incur an additional fee at the discretion of the surgeon.
