

# MAKE NO BONES ABOUT IT!

## Thanksgiving Pet Safety Tips

Although, your pet may say yes to a turkey drumstick or a ham bone, keep bones out of your pets reach. Turkey and ham bones can cause serious injury to your pet if they splinter or become lodged in or puncture your pet's digestive track. Larger bones, like ham bones, can even become lodged or stuck in your pet's mouth, throat or stomach. Keep your pets safe this holiday and just say no to bones!

If you do give your pet a special thanksgiving treat, be sure to limit the amount. Too many fatty, rich or unfamiliar foods can cause painful and serious medical conditions that may require emergency care. Be aware of what is in the food you are giving your pet, certain types of vegetables, herbs and spices can be toxic to your pet. Keep your pet's thanksgiving treats simple and free of any special flavors or seasoning.

### Safe To Share!
